

## ПРАКТИЧЕСКОЕ ЗАНЯТИЕ №

*Тема:*

*Введение. Наш колледж*

**I.**

***1. Read the text. Find the words of Prof. M. P. Konchalovsky and discuss. Learn the words from the oath (Прочтите текст. Найдите высказывание профессора Кончаловского о враче. Выучите наизусть слова из клятвы Гиппократ).***

### **Our Future Profession**

In Belarus thousands of young people study at different medical institutes. They study numerous theoretical and special subjects. They have practical training during which they do the work of nurses and assistant doctors. Such a course of studies helps them to gain much knowledge of medicine, which will give them the possibility to diagnose different diseases and treat people. But medical students must remember that it is not easy to be a good doctor. A good doctor must have not only deep knowledge of a particular field of medicine such as surgery or therapy. He must love people and have a kind heart. He must give all his knowledge, all his abilities, all his talent, and all his time to people, to the protection of their health.

One of the prominent Soviet therapist Prof. M. P. Konchalovsky considers that a person may be a poor writer, he may be a bad painter or an actor but a man cannot and must not be a bad doctor. Medical students must understand well all the difficulties of their future profession. They must remember that often it will be difficult to diagnose a disease, sometimes it will be even more difficult to cure it. But a good doctor will always do his best to gain his patient's confidence. And the confidence of a patient in his doctor is a "valuable remedy". Did you hear about Hippocrates Oath before you entered the Institute? What does it read? It reads, "I shall enter any house for the good of the patient. I shall not do my patient any harm" — these are the words from Hippocrates Oath. And they must be not only words for medical students. They must become the motto of their life.

Medical students must remember that to treat patients is a great art but not an ordinary trade (ремесло). It is one of the professions which requires a real calling for it.

***Домашнее задание:***

***Retell the text, using 5 or more sentences (Перескажите текст, используя не менее 5 предложений).***

**II.**

### **I.Zalutskij Molodechno State Medical College**

Molodechno Medical School was founded in 1991. In 2007 it received the status of a college. In 2018 the College received its current name: I.Zalutskij Molodechno State Medical College . It was named after its graduate Iosif Zalutskij, Belarusian medical scientist, oncologist. I.Zalutskij was a Corresponding Member of the National

Academy of Sciences of Belarus, Doctor of Medical Sciences, Professor. He was the director of the Research Institute of Oncology and Medical Radiology and the Institute of Physiology of the National Academy of Sciences of Belarus. In 2001-2009 he was the chief oncologist of the Ministry of Health of the Republic of Belarus. Zalutskij is the author of more than 300 works, 7 monographs, 17 patents. He was awarded the badge "Excellent Health Worker", diplomas of the Ministry of Health of the Republic of Belarus.

Today studies are arranged on the basis of the general secondary education. Currently, about 500 students study at the College. The teaching process is organized at two specialties: "Nursing", qualification "nurse" and "Therapeutic nursing", qualification "obstetrician, physician assistant". The duration of the course for the specialty "Nursing" is a year and 10 months, for the specialty "Therapeutic nursing" - 2 years and 10 months.

The main aim of the College is to provide the students with the knowledge and skills meeting the requirements of current practical medicine. Graduates of the College get a diploma of international specimen. The teaching is based on the curriculum approved by the Ministry of Health and the Ministry of Education. The academic year is divided into 2 terms (semesters). At the end of each term students take exams in several subjects.

In the first year the students study the so-called "preclinical subjects" including Anatomy, Biology, Philosophy, Pharmacology, Physiology, Latin, English, Hygiene, Genetics, etc. The students attend lectures, work in practical classes, spend much time in different laboratories.

In the 2<sup>nd</sup>, 3<sup>rd</sup> years the studies are devoted to special medical subjects: Therapy, Surgery, Cardiology, Oncology, Gynaecology, Neurology, Psychiatry, etc. Practical skills are very important. Practical courses are taught at the city hospitals and out-patient clinics, and college skill development laboratory, where the most advanced teaching methods are applied. Besides, senior students acquire the necessary practical skills during practical training working as medical nurses and doctors' assistants.

For profound study of the subjects there are 23 study-rooms and laboratories equipped according to the modern requirements and achievements in medicine. The

College also provides facilities for social and sports activities and encourages the students to get involved in the cultural life giving lots of opportunities for all talents and abilities. There is a library and reading-room, conference hall with up-to-date equipment, computer rooms with Internet access and gym in the college. Most of the students live in the hostel. The students who make good progress in their studies get scholarships. Many students take part in research work and are members of the student scientific society. Research helps them expand their knowledge.

### **1. Fill in the missing parts:**

1. Molodechno Medical School was founded in ... .
2. In 2018 the College was named after its graduate ... , Belarusian medical scientist, ...
3. The teaching process is organized at two ... : "Nursing", qualification "... " and "Therapeutic nursing", qualification "... , physician assistant".
4. The academic year is divided into 2 ... (semesters).
5. In the first year the students study the so-called "...".
6. In the 2<sup>nd</sup>, 3<sup>rd</sup> years the studies are devoted to special ... subjects.
7. Students who make good ... in study get ... .

### **2. Agree or disagree with the following sentences using the formulas of agreement and disagreement:**

I quite agree with you; That's right; That's wrong; I don't agree (I disagree); I'm of the same opinion.

1. During the first two years the students begin to master clinical subjects.
2. Practical skills are acquired during students' practical training.
3. All the students get scholarships.
4. Most of the students live in the hostel.

### **3. Answer the questions on the text:**

1. How many specialties are there at our College?
2. What specialists do they train?
3. How long is the course of study at the College?
4. What is the teaching based on?
5. When do the students take exams?
6. What do the students study during the 1<sup>st</sup> year?
7. What do the students study during the 2<sup>nd</sup> and 3<sup>rd</sup> years?
8. When do the students have practical training?
9. What kind of facilities does the College provide?
10. Where do students live?

### ***Домашнее задание:***

***Retell the text, using questions from ex.3 (Перескажите текст, используя вопросы из упр.3).***
